

## SmartManager: software/firmware info

SmartManager is available in two versions according to related firmware, as following:

|                     | FW v1.0.1      | FW v1.0.5 and later |
|---------------------|----------------|---------------------|
| SmartManager v1.2.9 | Compatible     | NOT compatible      |
| SmartManager v1.4.1 | NOT compatible | Compatible          |

Use:

- 1) Run firstly SmartManager v1.4.1 to connect to the board:

- 2) Refer to firmware information in the bottom bar, e.g.:

- 3) Check firmware version:

- a) Application Version 1.0.5 and later, continue with SmartManager v1.4.1 to interact with the board.

- b) Application Version 1.0.1, please exit from SmartManager v1.4.1 and run v.1.2.9 instead:
